## Policy:

Dayco's top priority is the health and safety of our employees and preserving the environment. We strive to provide a safe workplace and limit any environmental impacts while promoting enterprise-wide environmental and social governance.

Our principals related to Environmental, Health & Safety (EHS) are key to the Company's core values. The following principals create a framework to continually improve our performance:

- Maintain compliance with all applicable legal and other requirements.
- Commit to the consultation and participation of suppliers, contactors, employees and their representatives resulting in safe and sustainable operations.
- Eliminate hazards, reduce OH&S risks, lessen the likelihood of workplace injuries, and prevent safety incidents related to our activities and products through proper evaluation and utilization of:
  - Incident and accident management
  - Personal protective equipment
  - Machine safety
  - Workplace ergonomics
  - Handling of chemicals
- Implement protocols and procedures that include emergency preparedness and fire safety to ensure employees are ready in the occurrence of a catastrophic event.
- Commit to the protection of the environment and minimization of environmental impacts by encouraging environmental responsibility and sustainable resource management among our employees, suppliers, and contractors in the following areas:
  - Pollution prevention
  - Greenhouse gas emissions reduction
  - Use of renewable energy
  - Improved energy efficiency
  - Air quality
  - Water quality and consumption
  - Waste reduction
  - Responsible chemical management

- Proactively identify and control our environmental aspects and safety risks through management systems focused on continual improvement goals and objectives.
