

DAYCO® ELECTRIC WATER PUMPS

HIGH QUALITY, AFFORDABLE ALTERNATIVE TO OE PUMPS

Dayco's OE-engineered line of electric water pumps covers close to 30 million vehicles in operation, specifically electric, hybrid and many start/stop applications. Dayco's ISO certified electric water pumps do not require any modifications during installation and are designed to help maintain systems that improve fuel economy and increase engine response and engine-off cooling.

Select applications also come with a more robust aluminum cover to help address premature failure that occurs with some OEM plastic pump covers. In addition, mounting bolts are included with most Dayco electric water pumps.

FEATURES:

- Robust aluminum cover replaces failure prone plastic cover for extended pump life
- Stainless steel components ensure resistance to corrosion and rust
- Advanced internal bearing design resists corrosion and is compatible with all coolants

BENEFITS:

- Easy installation with no modifications required
- Maintains OE systems that improve fuel economy
- Designed to handle extremely corrosive, high-temperature environments
