

DAYCO® HEAVY-DUTY SERPENTINE BELTS

BUILT TO HANDLE THE TOUGHEST ENGINE CONDITIONS

The Dayco heavy-duty diesel-grade serpentine belt features extreme-duty construction compared to conventional belts to meet the high torque and power pulses exerted by today's demanding diesel engines. The specially treated cords within the belt resist stretching and ensure the length stability that is essential for drive systems on high output diesel and gas engines.

Made from EPDM material to guarantee resistance to higher heat and heavier loads, Dayco heavy-duty belts are extreme engineered to perform at peak levels with multiple accessories – air conditioning, power steering pumps, alternators, water pumps, vacuum pumps – and operating conditions with temperatures up to 266°F (130°C).

FEATURES:

- High-grade EPDM compounds engineered for high torque and power pulses
- A high-flex belt backing for excellent performance and tension on smaller diameter pulleys
- Specially formulated cords and rib profile that deliver superior belt flexibility, system stability and load carrying capacity

BENEFITS:

- Meets OE specifications and the latest industry standards
- Guaranteed to provide ongoing dependable service, low noise and longer belt life for less vehicle downtime
- Designed to deliver engine economy, efficiency and cost-savings for today's fleet managers
