

DAYCO POWER® TRX POWERSPORTS BELTS

BUILT TO HANDLE EXTREME HEAT AND WEAR

Dayco POWER® TRX rounds out the brand's line of premium application-specific CVT belts, which optimize engine size, horsepower range and riding style for ATV, SXS and snowmobile riders.

Reinforced fiber technology, armor-grade protectants and proprietary processing enable Dayco POWER TRX to meet and exceed the demands of the industry's highest-performing powersports applications of 800cc and above, including turbocharged engines, heavily modified machines and high output powertrains.

The belt is designed with a proprietary EPDM construction and embedded aramid cord for enhanced durability. It also features specialized fabrics on the inner and outer tooth surfaces, which contribute to the belt's ability to transfer maximum power, provide high thermal stability and resist wear.

FEATURES:

- An exclusive EPDM formulation with custom-engineered textiles and protective agents minimize glazing and slipping
- An advanced dual-cog design improves belt flexibility for smooth, reliable pulley operation
- Belt compounds optimize performance for extreme rigidity and flexibility under heavy loads

BENEFITS:

- Long-lasting performance for intense driving, hard accelerations, mudding, deep snow and hauling
- Maximum heat dissipation and aggressive power transfer for extreme conditions
- Industrial-grade durability prevents belt fishing and cord damage during intense riding
